FAQs

To help you answer customers questions

How does NeedleBay help to remind me to take my insulin injection?

With the pen needles clamped into the NeedleBay Pod you can easily see whether a pen needle has or has not been used.

How is NeedleBay safer for storing and using pen needles?

Once clamped in the pod, there's no need to handle the pen needle during attachment or removal of an injection pen. Used pen needles are securely stored until disposal.

Can NeedleBay hold any make of pen needle?

Yes, most of the leading brands can be used with NeedleBay.

Where can I buy NeedleBay?

NeedleBay products can be purchased direct from our site [needlebay.com](https://needlebay.com) where you will also find a list of suppliers and stockists.

How long will NeedleBay last?

NeedleBay has been manufactured from high quality materials and has been designed for continuous use over several years.

How can I clean NeedleBay?

NeedleBay can be cleaned in warm soapy water or placed in a dishwasher.

Is NeedleBay recyclable?

Yes, manufactured using 100% renewable energy, NeedleBay is committed to sustainability, with its pods being 100% recyclable.

TUTOR GUIDE

NeedleBay Medical Technology

Daily Needle Control

Introducing the life-changing solution for the management of insulin pen needles and diabetes medication.

Introducing the life-changing solution for the management of insulin pen needles and diabetes medication.

## Daily Needle Control

needlebay.com

### Greater Control of Medication

NeedleBay simplifies diabetes medication management by storing insulin needles, allowing you to prepare in advance and streamline your routine.

### Reminder System & Proof of Dose

Insulin dosing can be challenging, with risks of overdose or missed injections. NeedleBay provides a unique reminder and proof of dose system, storing needles for the day and providing a simple solution for tracking injections to ensure safety and adherence.

### Needle Handling

For individuals with poor dexterity, handling insulin pen needles can be challenging. NeedleBay's ergonomic design and preloaded needles provide a straightforward and safe solution for users of all abilities.

### Independent Living

With the growing preference for independent living, NeedleBay facilitates this by accommodating individuals with poor dexterity or eyesight who may usually rely on healthcare providers for insulin administration and medication management.

### Single use Needles

Reusing needles inadvertently can lead to lipohypertrophy, which causes blood sugar fluctuations and health risks. NeedleBay prevents this by promoting single-use needle practices.

# 88%

**FACT: NeedleBay users said that NeedleBay improved their medication and injection management by 88%.**

Thank You! to NeedleBay for saving my memory when trying to wrack my brain as to whether I have or haven't done my injection, for a diabetic to forget their insulin can be a matter of life and death.

Sally Landsborough, 27

Brilliant, quick and easy. NeedleBay is the best!

Les Cobbett, 82

### Needle Storage

Diabetics often face challenges in safely storing needles, especially when on the go. NeedleBay provides a universal solution for both new and used needles. With the NeedleBay ClickLok system, new needles are securely stored in the daily modules for safe use and easy disposal afterward.

### Cost Effective

NeedleBay, designed to last, delivers exceptional quality. Considering its benefits in supporting diabetes medication management, its cost amounts to just a few pence per day, providing peace of mind.

### Perfect for on-the-go

The NeedleBay system is perfect for any situation, whether you're at home, out for the day, or traveling. NeedleBay Pods can be prepared in advance, ensuring you have the medication you need, wherever you are.

### All Ages

Needlebay is designed to accommodate individuals of all ages, making it a versatile solution. Whether you're a young student requiring medication during school hours or a retiree in search of help with organisation, Needlebay has you covered.

NeedleBay has made many of my patient's lives easier and supports safe & hygienic injection practice. For one patient in particular it has meant that district nurses no longer have to visit 2-3 times daily to administer insulin.

Karen Pudge, NHS  
Diabetes Specialist Nurse
